

Project Name: Ely Weed Harvester 6525
Client: Environment Agency

Aquatic Control Engineering – Project Profile

Berkenheger Weed Harvester 6525 at Ely

The Berkenheger 6525 is the most recent weed harvester to be supplied by Ace, The 6525 was supplied to the Environment Agency in Cambridgeshire Berkenheger boats are known for their quality but the 6525 took this to a new level due to changes at Berkenheger these boats now offer a superior finish along with all the previous qualities of :

- Good operating speed
- Outstanding overall Visibility
- High manoeuvrability
- Extensive Loading Area
- Ability to Off load to 2m Height Quickly
- Stability and Reliability
- Usability on the watercourse e.g. Passes under Low Bridges
- Productivity / Efficiency

On the boat supplied to Ely the engine compartment was extended by 500mm, allowing the engine to be mounted lengthways. Doing this allows for a better overall trim of the boat and increased serviceability due to more space in and around the engine compartment.
